

Certificate in Project Management for Construction

Build a solid foundation for project success by applying the Project Management Body of Knowledge (PMBOK® Guide) framework.

Project managers enjoy an exciting and fulfilling career by helping organizations increase efficiency, reduce costs and meet important outcomes and deadlines.

COURSE OF STUDY

Earn a certificate by completing the following four modules:

PMP-X805BD Construction Project Management Introduction and Overview

Students will gain an in depth understanding of the Project Manager's role in the construction industry. Emphasis will be placed on understanding factors that impact construction projects and their timely delivery.

PMP-X806BD Scope, Schedule, Cost, and Quality Management

The intent of this course is to provide students with an in-depth understanding of Scope Management and the steps necessary to develop a project schedule. Students will explore differences, challenges and opportunities when working with General Contractors and Subcontractors.

PMP-X807BD Resource, Communications, Risk, and Procurement Management

This course will teach students about Resource Management skills necessary to identify the key players in the project and how to prepare and deliver focused presentations.

PMP-X808BD Stakeholder & Financial Management & Health, Safety, and Security Overview

In this course we will address Stakeholders in construction and how to identify understand their impact and influence throughout a project life cycle.
